

Mr. V. NIDHIN (URK18ME006)

I am Nidhin V-URK18ME006 (2018-2022). Karunya Institute of Technology and Sciences is an exceptional college for providing outstanding education and training in the field of mechanical engineering. The college is well equipped with cutting-edge technology and resources, allowing students to obtain a thorough understanding of their chosen field. The college also boasts an excellent campus life, with several activities and events that encourage students to interact and engage with one another. During my first year of college, I was a Company Quartermaster Sergeant in the National Cadet Corps (NCC). This three-year experience helped me improve my leadership, organisational, and communication skills. I was in charge of the general operation of the NCC platoon. I was also in charge of running physical training drills, planning numerous extracurricular events and guiding the cadets. I learned how to effectively manage time, allocate responsibilities, and motivate others to reach their objectives.

My college hostel experience was one of the best of my life. While residing at the hostel, I met some of my best friends. It was an incredible experience to meet individuals from all around the world and learn about their cultures. The hostel provided a safe and secure environment, and the staff was always pleasant and helpful. My degree in mechanical engineering has been crucial to my success in the Indian Navy as a Sub-Lieutenant today and in the final year of my study I also secured placement in Capgemini which is a core company. I was able to hone my communication and decision-making abilities via my coursework. Overall, as a Sub-Lieutenant in the Indian Navy, my mechanical engineering degree has been a huge asset. I now have the technical know-how and leadership abilities I need to succeed in this profession. I have the confidence that I will continue to use the knowledge and abilities I have acquired through my education to positively influence my life.
